

PRODUCTION SITES OF RION DES LANDES & LESGOR

South-West of France,
Located between Bordeaux, Pau and Biarritz

Subsidiary of Arkema group, MLPC International is located in the Landes region for 80 years. Thanks to its expertise in the chemistry of carbon disulfide and amines, it is now a world leader in the production of vulcanizing agents used for the largest part in the rubber processing market, but also for synthesis intermediates for agrochemicals and other specialties. With its plants in Rion des Landes and Lesgor, MLPC International is a major player in the chemicals industry of the Landes region. We have one of the best export sales rates, with 87% of its products going to industries around the world.

Rion des Landes plant

Lesgor plant

Description of the site activity

MLPC sites are classified SEVESO Threshold and are committed to a Risk Management policy of major accidents and protecting the environment. All units have recently been reviewed in terms of risk assessment as part of the PPRT technological risk prevention plan process (Plan de Prévention des Risques Technologiques in French). Statistics and Key performance indicators allow for regular monitoring of sensitive points.

In addition, the Rion des Landes and Lesgor plants are certified according to ISO 9001, ISO 14001, OSHAS 18001 standards and according to Arkema's internal AIMS (Arkema Integrated Management System).

Thanks to its Research & Development policy, MLPC International develops chemicals and offers solutions adapted to the needs of its customers under its Ekaland™ and Mixland® brands, as well as those of Arkema, its parent company, Vultac® and Rosinox®. The company offers **alternatives to CMR issues** (Carcinogenic, Mutagenic, Reprotoxic), and develops **non-nitrosamines vulcanization systems**.

MLPC in dates

- 1939 « Manufacture Landaise de Produits Chimiques »'s establishment
- 1955 Construction of a new production plant in Lesgor
- 2000 Start-up of a new MIXLAND+® pre-dispersed manufacturing workshop
- 2005 MLPC becomes a 100% subsidiary of the Arkema group
- 2010 Increase in the production capacity of guanidines
- 2011 Ozonation water treatment setting up at the Rion plant
- 2015 New R&D Center at the Lesgor plant
- 2017 Extension and modernization of the Phenolics Derivatives workshop
- 2018 Improvement of Lesgor wastewater treatment

safety in action

Because the safety of people and facilities is imperative for Arkema and its subsidiaries, the "Safety in Action" and "Accident Prevention through Observation" initiatives have been put in place to educate each employee, strengthen their involvement and to promote the exchange of good practices.

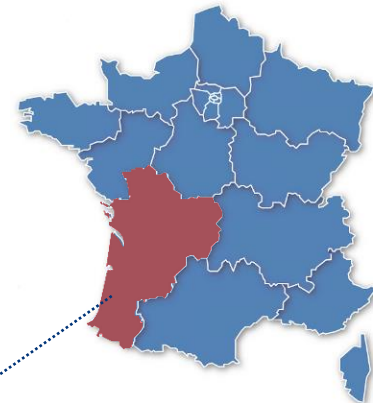

common ground®

MLPC International favors dialog in trust and transparency with its local communities. Furthermore, MLPC International supports various organizations in Rion des Landes, such as the departmental fire and rescue service, sports clubs, environmental associations, etc...

Responsible Care®
OUR COMMITMENT TO SUSTAINABILITY

Aware of the impact of its activities on the life in the surroundings, the site applies a rigorous policy in terms of environmental protection and undertakes a process of constant progress to reduce its environmental footprint with actions to reduce its air and water emissions and the limitation of energy consumption.
